Subject: Toyota_MES_Data

Sreyas,

We are planning to build team competency in BIW fixture design & 3D plant development. Hence we require Toyota line 3D data, which is in the Archive folder. This data will help the team to understand the concepts, identify Standard parts & its suppliers, Fixture design Methodology.

So I request you to give your approval to us as well as to N&S team to restore data from archive folder to Toyota_MES folder and retain access to MFG team

Required data : Output Folder

With Regards,
Syama Ganti
